

Permit Notification
Midwest Glycol, LLC
Application for a Reclamation Facility (Antifreeze Recycling) Permit

The Kansas Department of Health and Environment (KDHE) has reviewed an application from Midwest Glycol, LLC to operate an Antifreeze Recycling Facility. The facility will be located at the LaCygne Industrial Park. The operations at the facility will consist of receiving used and waste antifreeze via tanker trucks or bulk containers and applying a series of processes to the incoming antifreeze to remanufacture an antifreeze that would be useable by the public. The mayor of LaCygne has certified that the application described herein is consistent with local zoning requirements, and the Linn County Commission also certified that the application is consistent with their Solid Waste Management Plan. KDHE has reviewed the application and found it to be in conformance with the state solid waste statutes and regulations.
